EDUCATION

Tarlac State University | Tarlac, Philippines Graduation Date: July 2026 Bachelor of Science in Computer Science
Final Cumulative GWA: 2.0

Technical Skills: TypeScript | JavaScript | Python | Java | React | HTML | CSS | Node.js | FastAPI | Visual Basic | PostgreSQL | SQL | Figma | Java | WordPress | Microsoft 365

WORK EXPERIENCE

The Petshop Boys Co. | Tarlac, Philippines Apr. 2025 – Mar. 2026

- Developed a Point-of-Sale (POS) system with integrated daily financial tracking and automated revenue reporting.
- Managed systematic data entry of store expenses, revenues, and inventory logs to ensure up-to-date financial tracking.
- Engaged directly with store customers to understand their needs and deliver personalized product recommendations.

Go Baluyot & Adion Law Office | Tarlac, Philippines Jun. 2025 – Jul. 2025

- Automated the billing pipeline by building an Excel-SQL interface that generates client-ready receipts matching existing corporate designs.
- Delivered hands-on IT support, diagnosed hardware issues, and provided expert recommendations for computer hardware upgrades.
- Consulted with administration to resolve server capacity limits, implementing an efficient router-based file-sharing system and network printer mapping.

PROJECTS

MELAScan | Bachelor's Thesis | React, Node.js, PostgreSQL, Python, FastAPI, YOLOv11, EfficientNet-B4 | Apr. 2026

- Acted as sole developer of our Bachelor's Thesis, a full-stack clinical management system for AI-assisted melanoma and skin lesion detection. Designed a YOLOv11 + EfficientNet-B4 ensemble pipeline with disagreement flagging and cosine-similarity tiebreaking to reduce false negatives from single-model inference.
- Architected a full-stack eHealth platform supporting patient/lesion record management, AI-powered lesion analysis, similar-case lookup, and role-based clinical workflows (RBAC) for clinicians and admins, deployed across Hugging Face Spaces (AI server) and Railway (app backend).

Exercise Lab | Case Study Project | HTML, CSS, PHP, MySQL, Figma | Web Application Dec. 2024

- Collaborated in a 4-person team to design and develop a responsive fitness website addressing common exercise barriers (fear of improper form, lack of experience) through accessible instructional content and demonstrations.
- Built core features including user authentication (sign up/login), an interactive BMI calculator with unit toggling (kg/lbs, ft/cm) and account-linked history, and a categorized exercise guide spanning six muscle-group/movement categories with video and step-by-step instructions.

Other Projects | Visual Basic

- **NomVet Clinic** | Case Study Project Dec. 2024
Built a landing page with an admin dashboard to facilitate volunteer submissions, implement access control, and monitor website analytics.

ADDITIONAL

Certificates: Cisco "CCNAv7: Switching, Routing, and Wireless Essentials", June 2024 | Cisco "CCNAv7: Introduction to Networks", Jan 2024.
